- Tools of the Trade: Linux and SQL - Google
- The Complete Cyber Security Course - Volume 1: Hackers Exposed - StationX
- The Complete Cyber Security Course - Volume 2: Network Security - StationX
- The Complete Cyber Security Course - Volume 3: Anonymous Browsing - StationX
- The Complete Cyber Security Course - Volume 4: End Point Protection - StationX

## Certifications

---

- Java 17 Masterclass: Start Coding in 2024 - Udemy
- Learn Ethical Hacking From Scratch - Udemy
- Complete Ethical Hacking Bootcamp - Udemy
- Ethical Hacking - Internshala Trainings
- Master AI Prompting - Brightso
- Introduction to Cybersecurity - Cisco
- Assets, Threats, and Vulnerabilities - Google
- Sound the Alarm: Detection and Response - Google
- Automate Cybersecurity Tasks with Python - Google
- Put It to Work: Prepare for Cybersecurity Jobs - Google
- Google Cybersecurity Specialization - Google
- Tata Cybersecurity Security Analyst Job Simulation on Forage - December 2024

## Projects

---

### 1. Personal Security Checklist

- Developed a checklist to help individuals assess their cybersecurity posture.
- Utilized knowledge of security best practices to create actionable items for users.

### 2. Steganography

- Created a tool to hide messages within images, enhancing understanding of data concealment techniques.
- Applied programming skills in Python to implement the project.

### 3. Password Strength Meter

- Designed a web-based application to evaluate password strength using HTML, JavaScript, and CSS.
- Promoted awareness of password security among users.
