Summary

Experience: 3 years as a Senior Developer, specializing in creating immersive Roleplay Servers for GTA V on the FiveM platform. Demonstrated expertise in developing CBRP, SVRP, and various other RP servers, showcasing a blend of technical acumen and creative vision.

Skills: Proficient in Java, with a strong foundation in cybersecurity principles including penetration testing and cyber defense. Adept in leveraging photography for storytelling within gaming environments. Excel in artificial intelligence applications, analytical skills, leadership, problem solving, and fostering teamwork.

Career Highlights:

Innovative Development: Conceptualized and executed unique gaming experiences on the FiveM platform, enhancing player engagement and community growth.

Cybersecurity Excellence: Strengthened server integrity and user data protection through cutting-edge penetration testing techniques and robust cyber defense strategies.

Leadership and Teamwork: Led diverse development teams to achieve project milestones ahead of deadlines, fostering an environment of collaboration and continuous learning.

Utilizing a blend of technical expertise and creative vision, I've contributed to the enhancement of online gaming communities, ensuring secure and engaging environments for players worldwide.
